Edvantage Science AP Chemistry 2
Chapter 6
Traffic Light Study Guide

| Section | Page | Learning Outcome | Red | Amber | Green |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 6.1 | 332 | Define hydrolysis. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | $\begin{gathered} 333 \\ -342 \end{gathered}$ | Identify any given salt as neutral, acidic, or basic. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | $\begin{gathered} 333 \\ -342 \end{gathered}$ | Identify the ion and provide the hydrolysis reaction responsible for the acidity or alkalinity of any salt. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | 334 | Calculate the pH of a basic salt solution. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | 336 | Calculate the pH of an acidic salt solution. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | $\begin{gathered} 339 \\ -340 \end{gathered}$ | Determine whether an amphoteric salt, in particular, is acidic or basic. A compound that is amphoteric contains or consists of two independent species, one that is an acid and one that is a base. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | $\begin{gathered} 341 \\ -342 \end{gathered}$ | Determine whether an amphiprotic ion is acidic or basic. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
| 6.2 | 348 | Define a buffer. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | $\begin{array}{r} 349 \\ -350 \\ \hline \end{array}$ | Describe the composition of a buffer. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | $\begin{gathered} 350 \\ -352 \end{gathered}$ | Describe and explain how an acidic buffer works. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | $\begin{gathered} \hline 354 \\ -356 \end{gathered}$ | Describe and explain how a basic buffer works. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | 357 | (Extension) State the Henderson-Hasselbalch equation. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | 357 | Define buffer capacity. State and explain what it depends upon. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | $\begin{gathered} 357 \\ -358 \end{gathered}$ | Given the desired pH of a buffer, describe how to prepare it. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | $\begin{gathered} 359 \\ -360 \end{gathered}$ | Write the chemical equation for the hemoglobin/oxyhemoglobin equilibrium present in our blood and explain why a steady pH is critical to this equilibrium. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | 360 | Write the chemical equation for one buffer system that helps keep our blood pH relatively constant. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
| 6.3 | 368 | Supply 3 criteria that a reaction must satisfy to be used for a titration. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | 368 | Define the equivalence point of an acid-base titration. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | $\begin{gathered} \hline 369 \\ -370 \\ \hline \end{gathered}$ | Describe an acid-base titration using the terms, burette, pipette, flask, titrant, standard solution, analyte, indicator, and transition point. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | $\begin{gathered} \hline 370 \\ -371 \\ \hline \end{gathered}$ | List 4 properties of a primary standard, state its purpose, and provide an example of an acidic and a basic primary standard. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | $\begin{gathered} 372 \\ -376 \end{gathered}$ | Use titration data to calculate concentration, volume, or molar mass. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | $\begin{gathered} \hline 377 \\ -378 \\ \hline \end{gathered}$ | Use data from the titration of an impure acid or base to calculate the acid or base's percent purity. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |

Chapter 6
Traffic Light Study Guide

| Section | Page | Learning Outcome | Red | Amber | Green |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 6.4 | $\begin{gathered} \hline 385 \\ -388 \end{gathered}$ | Describe how acid-base indicators work. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | $\begin{array}{\|c\|} \hline 386 \\ -387 \end{array}$ | Calculate an indicator's $\mathrm{K}_{\mathrm{a}}$ and state how to choose a suitable indicator for a titration. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | $\begin{array}{\|c\|} \hline 388 \\ -389 \\ \hline \end{array}$ | Determine the colour of a mixture of indicators in a solution of given pH (and vice-versa). | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | $\begin{array}{\|c\|} \hline 391 \\ -394 \\ \hline \end{array}$ | Calculate the key points of a strong acid - strong base titration (initial, $1 / 2$ equiv. pt., equiv. pt., \& excess titrant) and draw its curve. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | $\begin{array}{\|c\|} \hline 395 \\ -401 \end{array}$ | Calculate the key points of a weak acid - strong base titration (initial, $1 / 2$ equiv. pt., equiv. pt., \& excess titrant) and draw its curve. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | 401 | Describe and explain the differences between strong acid-strong base titration curves and weak acid-strong base titration curves. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | $\begin{array}{\|c\|} \hline 403 \\ -407 \\ \hline \end{array}$ | Calculate the key points of a weak base - strong acid titration (initial, $1 / 2$ equiv. pt., equiv. pt., \& excess titrant) and draw its curve. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | $\begin{aligned} & 391, \\ & 395, \\ & 403 \\ & \hline \end{aligned}$ | Write formula and ionic equations for neutralization reactions. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
| 6.5 | $\begin{array}{\|c\|} \hline 415 \\ -416 \\ \hline \end{array}$ | Describe the reactions of metal oxides with water. Identify a metal oxide as being a basic anhydride, an acidic anhydride or amphoteric. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | $\begin{array}{\|c\|} \hline 417 \\ -418 \\ \hline \end{array}$ | Describe the reactions of non-metal oxides with water. Describe the general periodic trend pertaining to non-metal oxides. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | $\begin{array}{\|c\|} \hline 419 \\ -423 \end{array}$ | Outline the causes and consequences of acid rain, citing at least two chemical reactions involved. | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
